PROJECTS / OPEN-SOURCE

Arduino car

This is an Arduino based project in which a car had been built and controlled by a bluetooth connection.

Online Fitness management System | Link   *HTML, CSS, JS, Bootstrap, PHP.*

This Project showcases the importance of health and fitness. It has some features(BMI) to calculate
individual person's health and helps users to book an appointment.

Voice recognisation   *HTML, CSS, Flask*

This application works with algorithms that perform linguistic and acoustic modeling. Acoustic
modeling is used to recognize phenones/phonetics in our input audio files get the more significant part of
speech, as words and sentences(text).

CERTIFICATIONS

- C Course - **sololearn**
- Python for Beginner - **Sololearn**
- SQL(Basic) - **HackerRank**
- Problem Solving - **HackerRank**
- Flask Essential Training - LinkedIn.
